

CS 688 – Fall 2013  
Homework 1 – Due Sept. 17

Professor: Carlotta Domeniconi

Solve the following exercises from the textbook: 1.3, 1.5, 1.6, 1.11, 1.13, 1.21.

For Exercise 1.6, you can assume discrete random variables.

Please note that we already solved in class exercises 1.5 and 1.11, but it's good practice for you to derive those results again on your own.
